

IT Security

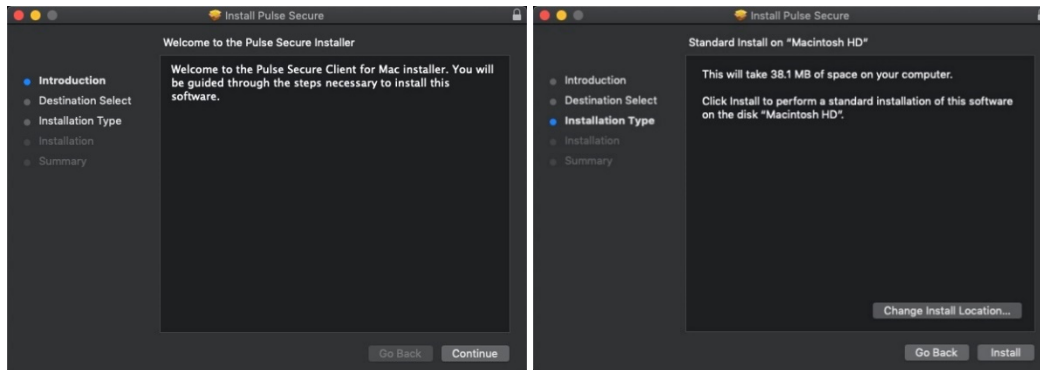

Download and Install and Configure Conestoga College Pulse Secure VPN (MAC)

To download Pulse Secure VPN Client for Mac, Go to:

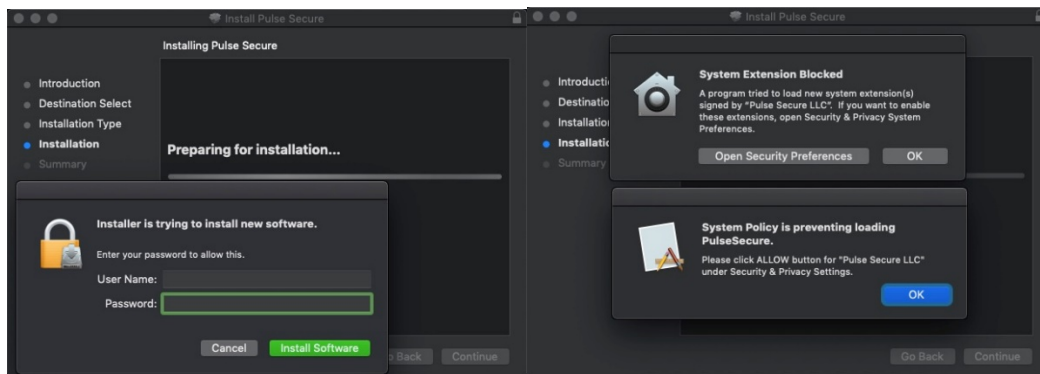

<https://it.conestogac.on.ca/Downloads>

Scroll down until you see (Pulse Secure VPN client)

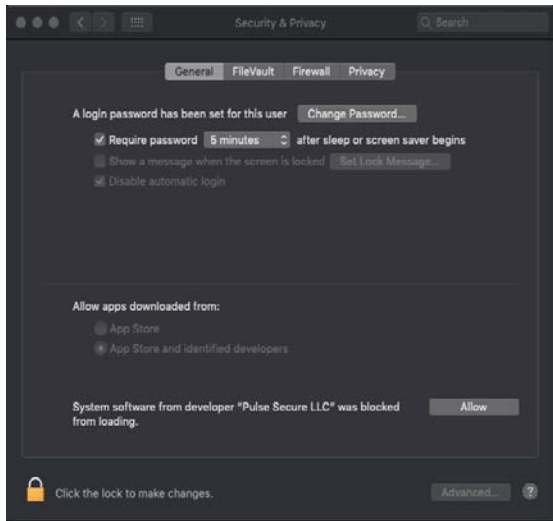

After you have installed file that suit your OS you need to configure College\_VPN Link

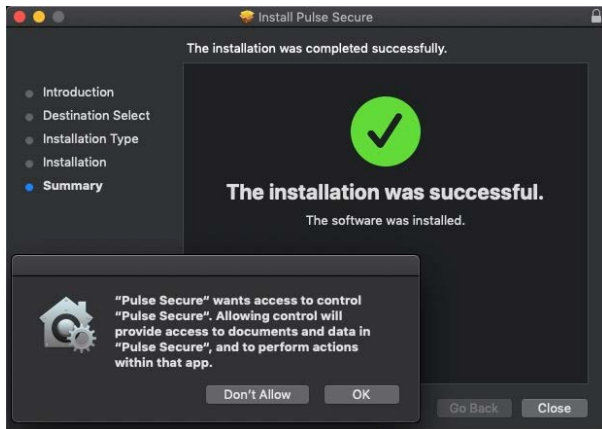

Once you begin the installation you will receive a few security prompts

Type in your mac account credentials and then open your security preferences

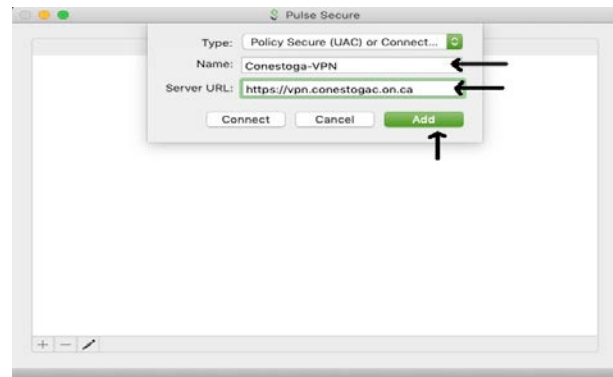

Click the “Allow” button to enable the installation. >>

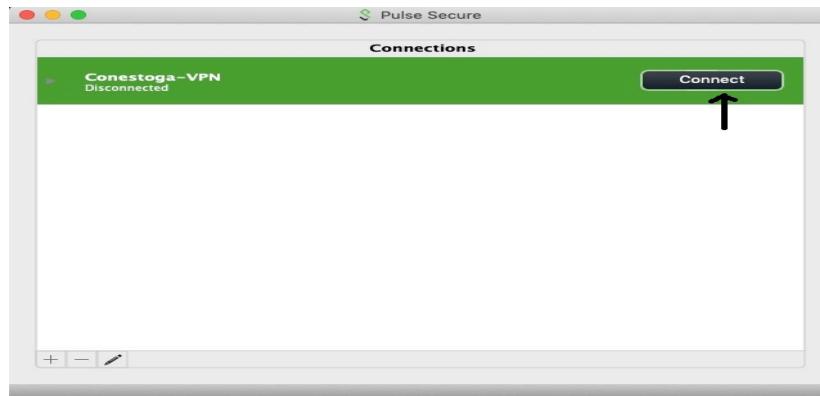

Once the installation finishes, click OK to allow. >>

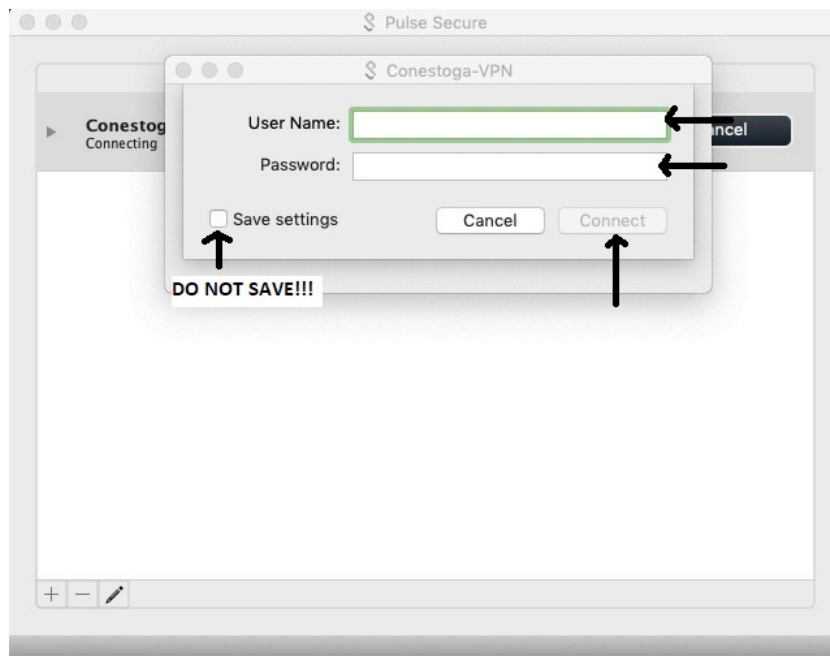

Now, Open the new Pulse Secure App and add a link (URL):

Now that you have completed this step you are ready to connect>>

Please use your college login user name and your password, It is not recommended that you save this credentials.

Great Job you are done, you can access you links, direct College Applications favorites and more like you are in the College Office. When you are done, please disconnect – close the connections for security reasons.
